EXECUTIVE SUMMARY

8+ years of experience in design, development, and delivery of enterprise-grade applications using .NET Core, React, SQL Server, and Microservices.

Strong expertise in REST APIs, Entity Framework Core, LINQ, RabbitMQ, Keycloak, and cloud-native application development.

Experienced in designing scalable distributed systems, asynchronous messaging solutions, and secure authentication/authorization platforms.

Hands-on experience in BFSI domain including Trade Lifecycle Management, Collateral Management, Settlement Processing, and International Transfers.

Proven ability to collaborate with cross-functional teams and deliver high-quality software solutions using Agile methodologies.

Passionate about clean architecture, performance optimization, and modern software engineering practices.

CORE COMPETENCIES

Application Development & Modernization

Microservices Architecture

REST API Design & Development

Technical Leadership & Mentoring

Cloud & DevOps Practices

Performance Optimization

Agile/Scrum Delivery

Stakeholder Collaboration

CORE SKILLS

Languages: C#, JavaScript, TypeScript

Frameworks: .NET Core, ASP.NET MVC, Web API, Entity Framework Core, React.js

Databases: SQL Server

Messaging: RabbitMQ

Security: Keycloak, SSO, Authentication & Authorization

Cloud & DevOps: Azure DevOps, Docker, Git

Tools: Postman, Swagger, Visual Studio, VS Code

Practices: Microservices, REST APIs, Agile/Scrum

WORK EXPERIENCE

CSC Global (Formerly Viteos Capital Market Services) | Senior System Analyst | Jul 2017 – Present

Designed and developed .NET Core microservices integrated with RabbitMQ for asynchronous communication and event-driven architecture.

Implemented Keycloak-based authentication and authorization solutions with Single Sign-On (SSO).

Developed reusable React.js components and modern user interfaces, improving maintainability and user experience.

Optimized SQL Server queries, indexes, and stored procedures to improve application performance.

Worked on Trade Lifecycle Management, Collateral Management, Margin Call Management, Settlement & Transfer, Substitution, and Dispute Management modules.

Built Wire Transfer applications integrating SWIFT messaging and international payment workflows.

Developed Coinbase integration services with secure HMAC SHA-256 authentication and transaction processing.

Designed exchange-rate triangulation services using ECB exchange rates.

Built Quartz.NET scheduler framework for reconciliation, reporting, and file-processing automation.

Unitronic Solutions | Software Developer | Mar 2015 – Sep 2017

Developed WPF and WinForms applications using C# and SQL Server.

Integrated Crystal Reports for enterprise reporting requirements.

Participated across all SDLC phases including requirement analysis, development, testing, and deployment.

Delivered ID Card Personalization and Aadhaar Smart Card applications.

EDUCATION

B.E. Computer Science | STJ Institute of Technology | 2013

Diploma | Bapuji Polytechnic | 2010

SSLC | Anjum High School | 2007
